TWIST partners news

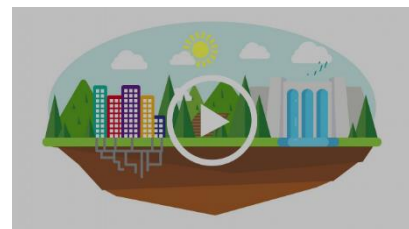

We present you the IFTS, Institut de la Filtration et des Techniques séparatives, one of the partners of the project

IFTS is a French Research Center with over 35 years of experience, specializing in particle-fluid separation technologies. We invite you to see a quick video about their work - click on the image.

PWP Portuguese Water Partnership, the partner responsible for project communication

PWP Promote innovation in the water sector, facilitating cooperation between companies and research centre. We invite you to see a quick video about their work - click on the image.

TWIST Overview

TWIST objective

TWIST - Transnational Water Innovation Strategy Project is an Interreg SUDOE Project that aims to develop an open model of innovation in wastewater management giving compliance with the Water Framework Directive and promoting a circular economy model.

The project is structured in 5 groups of tasks and its central work will be the creation of three Water Living Laboratories for the management, treatment, recycling and recovery of products in wastewater, to develop an open innovation process.
